***Allowable Subject Matter***

Claims 10-16, which are renumbered as 1-7, are allowed.

Regarding claim 10, the prior art discloses auxiliary batteries for portable devices, as well as user attachable, such as to a belt clip or as part of a watch style wrist strap. Also known in the prior art are devices where a dry cell battery may be attached to a phone to provide charge or supplement power when AC recharging is not available, and batteries providing power to memory for programming or data storage when a primary battery is dead or detached are also known. The presently claimed invention has a primary power source, which provides power for each and every powered function of the phone, so implicitly there is no other auxiliary battery, such as for data backup. The primary power source is located in a first portion which provides all functions of a portable phone, all of said functions being provided by said primary power source, in addition there is a user attachable second portion which comprises rechargeable cells distributed about the second portion which serves to recharge the primary power source when the two are connected. When incorporating all the limitations of the claim, none of the prior art discloses the features as claimed.

Claims 11-16 depend directly or indirectly from claim 10. When incorporating all the limitations of the base claim and any intervening claims, none of the prior art discloses the features as claimed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shaver (US 6,018,231) discloses a system wherein a rechargeable battery may be used as a charger for other portable batteries.
